

Caution point of component mass-production

Level

Difficulty level is different depend on project. Confirm content and judge you can deal or not.

Lv.2

Only work that set designated parts and change text and figure.

Lv.3

Set designated component and write style for layout if it is necessary. (※)

Be able to understand rule and set component even if it is not designated all part.

※Decide lay out individually or add component before work, after that, confirm and deal it.

Surround by section based on document structure.

Make class following H1~H6 that is written in component name and structure sheet. (refer to how to think outline)

It is Surrounded by div for layout, but section is not.
Surround surrounded area by section.

Understanding for coding knowledge
